Diversity and Importance of Amphibians

Introduction

Amphibians are little vertebrates(frogs, toads, tritons, salamanders)

There are only 11 species of amphibians in Estonia.

Amphibians are related to both water and land, but mostly they stay away from the reservoirs. They play a vital role in the ecosystem.

Use Internet to fill the worksheet

	Common Frog	Lake Frog	Water Frog	Common Toad	Crested Newt
Distribution / habitat					
Feeding					
Enemies
